CHAPTER 1

INTRODUCTION

Arkana Book Writer is a local desktop application for turning plain manuscripts into professionally formatted e-books. Import a document, choose a visual theme, and export a polished PDF or EPUB in seconds.

CHAPTER 2

IMPORT ANY FORMAT

Arkana reads Word documents, PDF files, and Markdown. There is no cloud upload step: parsing, styling, and export all happen on your own machine.

40 PUBLISHING THEMES

Pick from a catalog of forty visual themes, ranging from minimal editorial layouts to bold, high-contrast designs like the one used for this sample. Every theme controls typography, color, and page layout consistently across the whole book.

CHAPTER 4

EXPORT AND PUBLISH

When you are ready, Arkana generates a print-ready PDF or a Kindle-compatible EPUB. This sample page itself was produced by the app, in the Cyber Future theme, to show exactly what an exported cover looks like.
